Start preparing your project submission!

The project creation portal for Radar Hackathon is now open on the Colosseum platform, along with a new **Hackathon Dashboard**. You can save your team and project information, and track progress on each phase of the hackathon.

Don't worry, you still have a week left to complete your project. The official submission window will open on October 2 and close at 11:59pm PT on October 8.

A few tips:

- Remember to create a Twitter account for your hackathon project and start engaging with the broader crypto community.
- As the deadline approaches, be sure to reserve time to prepare your presentation slides and/or pitch video.
- Hackathon FAQs: If you have questions about the structure of the hackathon, how projects are judged, etc. please take a look at the **FAQ section on our website.**

- Read through our recent blog post on [How to Win a Colosseum Hackathon](#).
